CAREER OBJECTIVE

- Dedicated to perpetual learning, pursuing excellence in emerging technologies, and fostering my personal development through diligence, all with the growth and success of the organization.

EDUCATION

The University of Kalyani

Master of Computer Applications

Aug 2023

Percentage : 75%

Mankar College

Bachelor of Science in Computer Science

Aug 2021

CGPA: 8.1/10

SKILLS

Languages: C/C++,Java, Python JavaScript, HTML, CSS, MSSQL

Tools: Git/GitHub, SSMS, Visual Studio, VS Code, MongoDB Compass

Frameworks/Platform: Nodejs,Express, Django,

Libraries: React, Pandas, Numpy, Matplotlib, Seaborn

Subjects : DBMS, Data Structure and Algorithm

PROJECTS

LittleTalk | *React, HTML/CSS, Socket.io, Mongodb*

Dec 2023 – Present

- LittleTalk is a project designed to facilitate communication by allowing users to create accounts and exchange messages. The platform caters to two types of accounts: temporary accounts, automatically purged based on a predefined time or date, and permanent accounts. The concept of temporary accounts addresses the need for occasional social media use without long-term commitments.

Empowering E-commerce Businesses | *React, HTML/CSS, Express js, VS Code, MongoDB* Oct 2022 – Jun 2023

- Opted for ReactJS for the e-commerce website development due to its ability to create fast and seamless user experiences. Leveraged features like virtual DOM for efficient updates and unidirectional data flow for enhanced performance.
- Primarily focusing on backend development for the project while also contributing to frontend development tasks. Utilizing ReactJS to build reusable UI components and enhance the overall functionality of the website.

EXPERIENCE

Authentech Software Solution Pvt.Ltd.(Kolkata) | *Trainee Software Developer* September 2021- February 2022

- Developed web application UIs using HTML, CSS, and JavaScript during training, with exposure to ASP.NET technology. Also gained proficiency in SQL server while working on application database management.
- Contributed to the development of desktop applications such as payroll management, inventory management, and hospital management systems, acquiring skills in VB.NET. Demonstrated effective teamwork and time management within a collaborative environment.

ACHIEVEMENTS/TRAINING

- 11 Weeks Workshop on Data Structures and Algorithms - Geeksforgeeks
- Placement Preparation Program - Knowledge Gate
- Received a scholarship from the SVMCM Scholarship for my outstanding performance in BSc Computer Science.
- JECA (Joint Entrance for Computer Applications) Rank: 433
